PROFESSIONAL SUMMARY

Software Engineer with hands-on Python development experience and a strong problem-solving foundation in troubleshooting, debugging, and monitoring multi-component systems. Skilled in building and maintaining production-style monitoring and detection tools, with applied experience in Generative AI and AI solution design (RAG pipelines, multi-agent orchestration). Detail-oriented, collaborative, and proactive about system stability, documentation, and cross-functional issue resolution.

EXPERIENCE

Software Engineer Intern (Onsite) — Plural Technology Pvt Ltd. *Feb 2026 – May 2026*

- Diagnosed, debugged, and resolved detection issues in a real-time Python/YOLOv8 defect-detection module as part of a 9-member cross-functional team, achieving 85–95% accuracy across configurable object classes.
- Built and maintained a Python-based PostgreSQL monitoring dashboard with live green/red bounding-box alerts, proactively identifying issues and reducing manual checking through automated flagging on a secured private LAN.
- Performed systematic validation and root-cause analysis (85–90% accuracy) by manually verifying outputs against ground-truth annotations to identify and resolve false positives/negatives before deployment.
- Documented testing findings and fixes to support team knowledge-sharing and troubleshooting; completed the 4-month internship with an official certificate.

PROJECTS

AI Meeting Assistant — github.com/phadake111/AI-Video-Assistant

- Built a Python-based Retrieval-Augmented Generation (RAG) pipeline with ChromaDB embedding search and grounding strategies for multi-lingual query answering (English, Hindi/Hinglish), debugging and tuning the pipeline to a sub-2-second response latency.

Multi-Agent AI Research System — github.com/phadake111/AI-Research-assistant

- Engineered a Python multi-agent orchestration pipeline with agent collaboration and task routing across 10–15 sources per query; built relevance ranking and retrieval evaluation logic, troubleshooting synthesis quality to produce structured reports in a 3–4 -minute runtime.

Training Unit — github.com/phadake111/Training-Unit

- Developed a Python desktop application for end-to-end YOLOv8 model training (data collection, annotation, live testing); built a repeat-annotation feature that auto-applies prior frame annotations, identifying and eliminating a key source of manual re-work.

SKILLS

Programming: Python, SQL, FastAPI, OpenCV, PostgreSQL

Generative AI & AI Solution Architecture: RAG Pipelines, LangChain, MCP, ChromaDB, Grok AI

Debugging, Monitoring & Data Analytics: Pandas, Numpy, Seaborn, Matplotlib, Jupyter Notebook, Power BI, Grafana, Tableau

EDUCATION

Data Science (MCA) — Suryadatta Institute of Management and Mass Communication, Pune *Jun 2024 – Jun 2026*
CGPA: 8.41

Computer Applications (BBA-CA) — Garware College of Commerce, Pune *Jul 2021 – Apr 2024*
CGPA: 9.05

PUBLICATIONS

- "ChatGPT in Classrooms: Tool or Threat? A Comprehensive Study of Student Perceptions" — IEEE ICSFT 2026, 24 April 2026 (DOI: 10.1109/ICSFT67370.2026.11566611)

CERTIFICATIONS

- Oracle Certified Foundations Associate — Agentic AI (Oracle University, Aug 2026)
- Deep Learning — IIT Ropar (NPTEL)
- Data Analytics Virtual Job Simulation — Deloitte Australia (via Forage)
- AI, Life, and Employability Skills — Magic Bus (Infosys)

ACHIEVEMENTS

- Secured 1st rank in a coding competition during graduation.
- Presented the Student Activity Calendar project at the IMCC College Project Competition.
